

An Extraordinary Offer

to introduce you to the benefits of Membership in
G/L ELECTRONICS BOOK CLUB

for a limited time only you can obtain

ANY THREE of these unique books (Combined List Price \$32.85)
yours for only **99^c** each ... with Trial Club Membership

No. T-101—Electronic Circuit Design Handbook—Here is a carefully-planned reference source of over 500 different tried and tested circuits. This detailed compilation of practical design data answers the need for an organized gathering of proved circuits . . . designs that can easily serve as stepping stones to almost any kind of circuit you might want to build . . . that can be adapted or modified. 320 pps., 19 BIG Sections, over 600 illus. 8 1/2" x 11". List \$14.95.

No. 424—Ten Minute Test Techniques for Electronics Servicing—Without delving into involved theoretical discussions, this practical new handbook describes how to pinpoint trouble in any piece of electronic equipment quickly and easily. Step-by-step techniques are outlined for localizing trouble to an improperly operating stage, and then to the defective component itself, using a minimum of test equipment. Many "Time and Temper Savers" are included. 176 pps., 125 illus. List \$6.95.

No. G-108—The Oscilloscope—This classic text not only teaches you how to operate a scope properly, but also how to interpret waveforms correctly, how to align RF, IF, video, and audio circuits, the proper probes to use, and how to use a scope in diagnosing circuit faults. Included are experiments which help you understand the relationship between signal and sweep frequencies, effects of sync adjustments, marker signals, pulse voltages, etc. 224 pps. List \$6.95.

No. G-118—Electronics Data Handbook—An indispensable quick-reference handbook for everyone in electronics, particularly for industrial and engineering support technicians. Compiled to save reference time in looking up all necessary electronic equations, design data, etc. No more searching fruitlessly through half a dozen volumes for necessary problem-solving data . . . you'll save hours of time and effort and eliminate costly mistakes. 160 pps., 7 Sections. List \$4.95.

No. G-30—Handbook of Semiconductor Circuits—Contains 124 examples of practical transistor circuits, complete with operational data, along with large, clearly discernable schematic diagrams. An excellent reference for technicians who need to "bone-up" in preparation for servicing transistorized TV sets, etc. A "must" for lab and engineering technicians involved in transistor design work. Hundreds of illustrations and diagrams. 448 pps. List \$7.95.

No. 428—Pin-Point TV Troubles in 10 minutes—A MAMMOTH, quick-answer guide to over 700 TV circuit troubles. Contains 63 large-size photos of different picture-troubles, keyed to 50 trouble-finding charts which identify over 700 probable defects and pinpoint the most probable causes for defects in every circuit or major component. Also contains over 160 large-size waveform photos you can compare with those you see on your scope. 372 pps., 394 illus. List \$6.95.

No. 414—Servicing TV Receiver Circuits—With Special Color Section—Contains just the kind of practical, down-to-earth information you can use every day. Includes step-by-step approaches to locating and correcting defects in every section of the receiver—from tuner to picture tube, from power supply to audio output. A full 10 Chapters are devoted to step-by-step color TV test procedures and trouble-correction techniques. 224 pps., 34 Chapters. List \$6.95.

No. T-131—Electronic Engineering Measurements Filebook—A single source of measurement principles and practices for engineering technicians. Rather than the usual generalities, this book concentrates on detailed techniques—complete with test setups, waveforms, mathematical analyses, etc.—for measuring specific parameters deemed most important. Contains 60 complete "How to Measure" Sections. 256 pps.,—60 Sections. List \$9.95.

AN EXTRAORDINARY OFFER...

May we send you your choice of any three books on these pages as part of an unusual offer of a Trial Membership in G/L Electronics Book Club?

Here are quality hardbound volumes, each especially designed to help you increase your know-how, earning power, and enjoyment of electronics.

These handsome, hardbound books are indicative of the many other fine offerings made to Members . . . important books to read and keep . . . volumes with your specialized interests in mind.

Whatever your interest in electronics—radio and TV servicing, audio and hi-fi, industrial electronics, communications, electronics as a hobby—you will find that G/L Electronics Book Club will help you get the job you want, keep it, improve it or make your leisure hours more enjoyable. With the Club providing you with top quality books, you may broaden your knowledge and skills to build your income and increase enjoyment of electronics, too.

How You Profit From Club Membership

This special offer is just a sample of the help and generous savings the Club offers you. For here is a Club devoted exclusively to seeking out only those titles of interest to you as an electronics enthusiast. Membership in the Club offers you several advantages.

1. Charter Bonus: Take any three of the books shown (combined values up to \$32.85) for only 99¢ each with your Trial Membership.

2. Guaranteed Savings: The Club guarantees to save you 15% to 75% on all books offered.

3. Continuing Bonus: If you continue after this trial Membership, you will earn a Dividend Certificate for every book you purchase. Three Certificates, plus payment of the nominal sum of \$1.99, will entitle you to a valuable Book Dividend which you may choose from a special list provided members.

4. Wide Selection: Members are annually offered over 50 authoritative books on all phases of electronics.

5. Prevents You From Missing New Books: The Club's FREE monthly *News* gives you advance notice of important new books . . . books vital to your continued advancement.

This extraordinary offer is intended to prove to you, through your own experience, that these very real advantages can be yours . . . that it is possible to keep up with the literature published in your areas of interest . . . and to save substantially while so doing.

How the Club Works

Forthcoming selections are described in the FREE monthly *Club News*. Thus,

you are among the first to know about, and to own if you desire, significant books. You choose only the main or alternate selection you want (or advise if you wish no book at all) by means of a handy form and return envelope enclosed with the *News*. As part of your Trial Membership, you need purchase as few as four books during the coming 12 months. You would probably buy at least this many anyway . . . without the substantial savings offered through Club Membership.

Limited Time Offer!

Here, then, is an interesting opportunity to enroll on a trial basis . . . to prove to yourself, in a short time, the advantages of belonging to G/L Electronics Book Club. We urge you, if this unique offer is appealing, to act promptly, for we've reserved only a limited number of books for new Members.

To start your Membership on these attractive terms, simply fill out and mail the postage-paid card today. You will receive the three books of your choice for 10-day inspection. **SEND NO MONEY!** If you are not delighted, return them within 10 days and your Trial Membership will be cancelled without cost or obligation.
